## PROFESSIONAL SUMMARY

An energetic and focused Computer Programming student at Izmir University of Economics, dedicated to mastering software development, relational database management systems (RDBMS), and desktop/web application architectures. Equipped with practical project experience utilizing Python, C#, PHP, JavaScript, HTML, and CSS. Aiming to deliver user-oriented, high-performance, and scalable solutions while leveraging strong analytical problem-solving skills in industry projects.

## TECHNICAL SKILLS

**Programming Languages:** Python, C#, Java, PHP, JavaScript, HTML, CSS  
**Database Technologies:** MSSQL, MySQL (Stored Procedures, Triggers, Views)  
**Tools & Version Control:** Git, GitHub, Visual Studio, VS Code, PyCharm, IntelliJ IDEA  
**Office Productivity:** Microsoft Word, Microsoft Excel

## PROJECTS & PORTFOLIO

Source codes, relational database schemas, and technical documentations for desktop software automation and data management projects are fully accessible via my GitHub profile:

- **GitHub Portfolio:** [github.com/SarpYucel](https://github.com/SarpYucel)
- **Smart Meal Planning & Nutrition App** – Advanced desktop software utilizing Python and MSSQL for daily calorie, BMR, and macronutrient logging.
- **Market Customer Management System** – Automated member management and transaction system built on C# .NET WinForms and SQL Server asynchronous CRUD workflows.
- **Advanced Store & Supplier Database** – A relational database engine designed in MSSQL featuring optimized Stored Procedures, Triggers, and views for scalable data integrity.

## EDUCATION
